

Mylar Kites

Multi-purpose kites made with a combination of ripstop and Mylar that allows the pilot to fly the kite with a broader point of view.

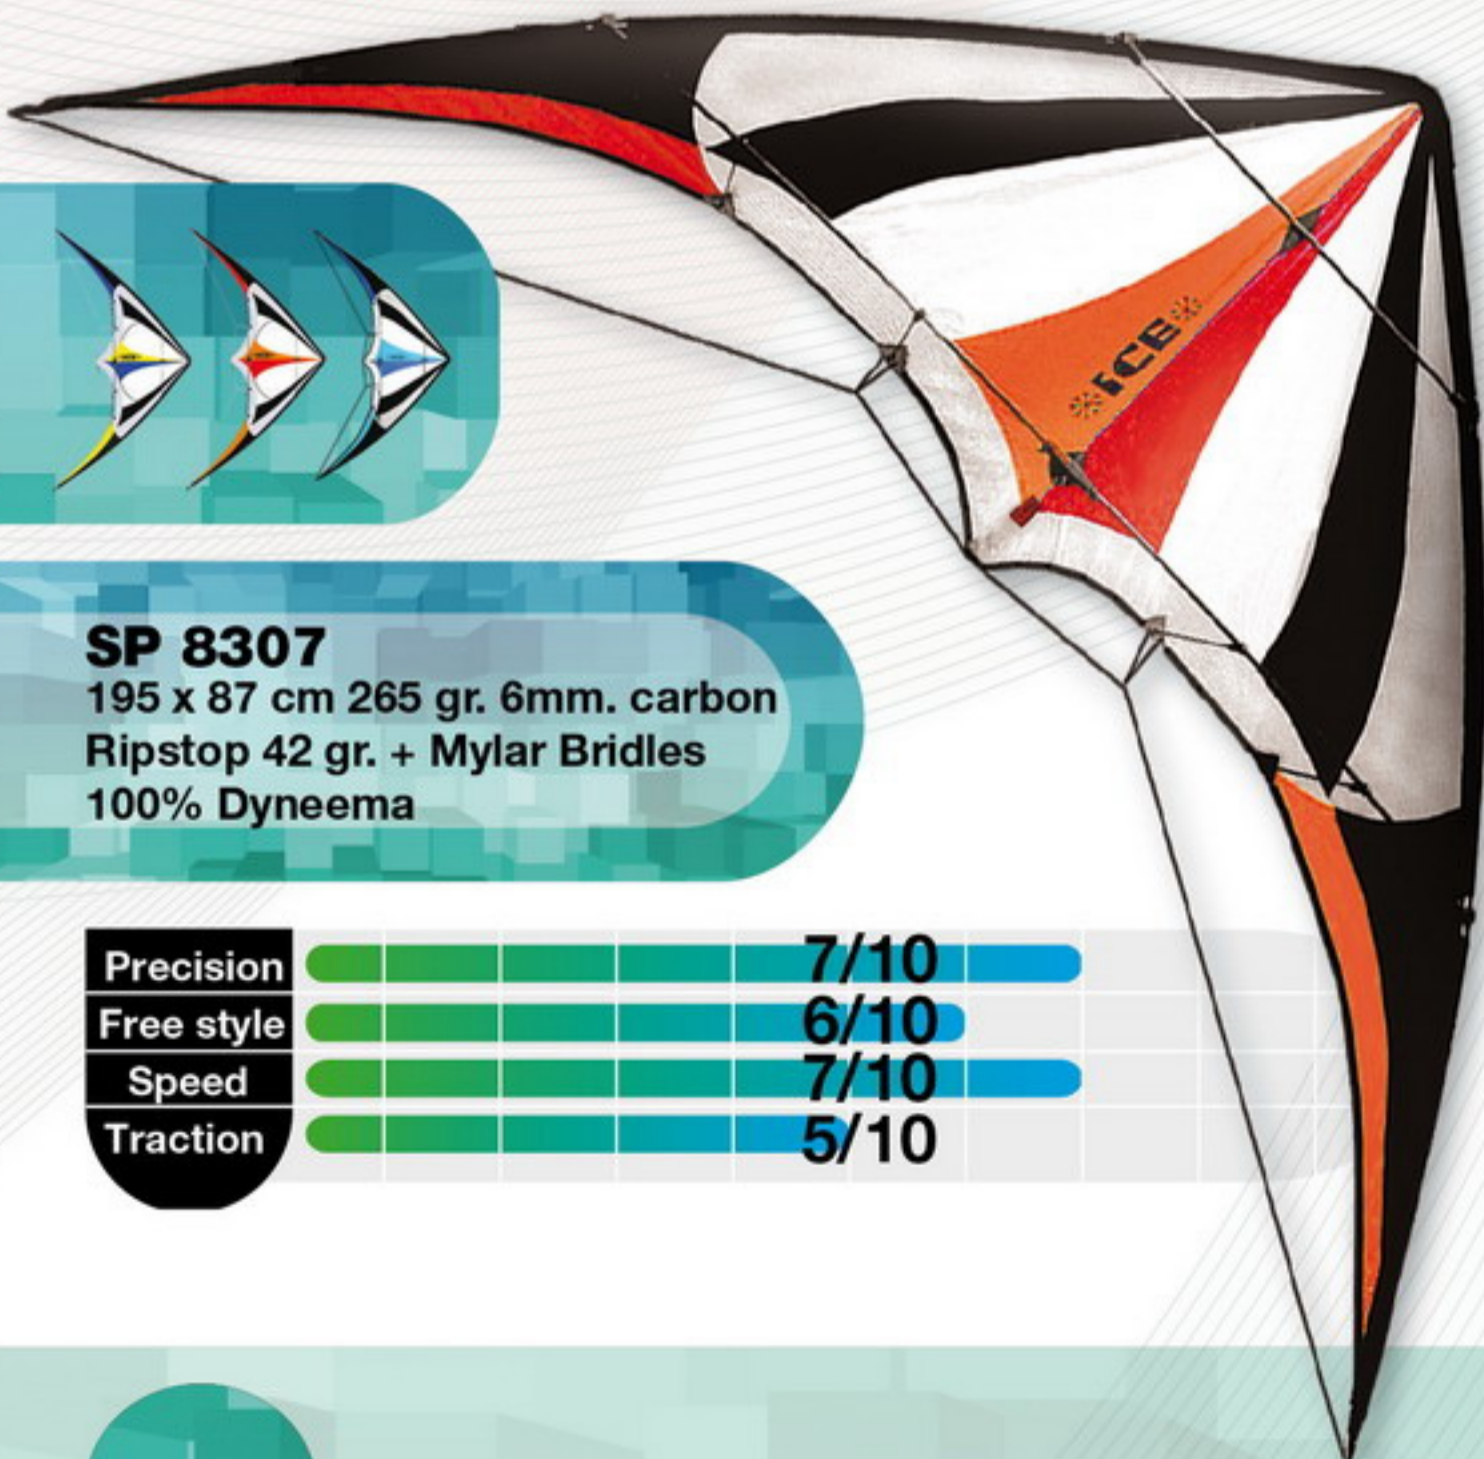

SP 8030

195 x 87 cm 265 gr. 6mm. carbon
Ripstop 42 gr. + Mylar Bridles
100% Dyneema

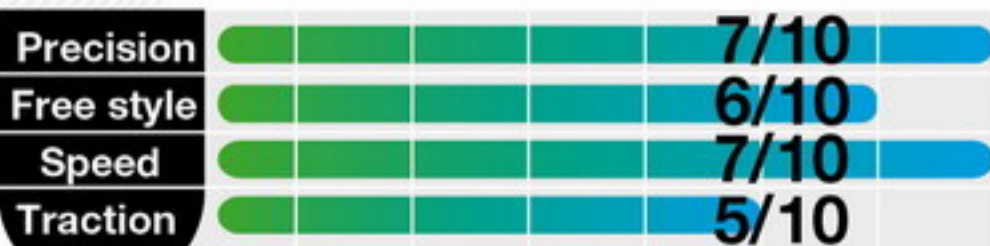

The new version of the mythic Blac hole! A more solid design and the use of better materials make this a multi-purpose and fun kite both for freestyle and precision disciplines.

SP 8307

195 x 87 cm 265 gr. 6mm. carbon
Ripstop 42 gr. + Mylar Bridles
100% Dyneema

Freestyle/ precision of intermediate made in 6mm carbon. Its great sail lets the pilot fly this kite in low winds and its quiet flight behaviour will make do great progress in the precision discipline, without having to renounce to freestyle.
